## Author's Note

"Angela's Family" is a case study that appears on the interactive website Global Violence Prevention [<http://www.globalvp.umn.edu>]. Global Violence Prevention is an interactive case study about family violence designed by the Minnesota Center Against Violence and Abuse [1]. The site's purpose is to teach individuals in service provision fields to respond effectively to victims and perpetrators by guiding users through an online case study about a family experiencing violence. This site can be used by individuals or groups of students in a classroom setting. The case helps users learn how to respond to the members of the family and work effectively with other professionals in meeting their needs.
